DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 28-32, 36-39, 41, and 48/28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 28 and its dependent claims recite that the setting value for the transfer bias for transferring the toner patch image is changeable in correspondence with *a density to be used to form the toner patch image* onto the transfer medium. Does applicant means the density that has been used to form the toner patch on the image bearing member? Or does applicant means the transfer bias to be used to form a toner patch image on the image bearing member, since a density can not be used to form a toner patch?

Allowable Subject Matter

3. Claims 42-45, 47, and 48/42 are allowed.

Response to Arguments

4. Applicant's arguments with respect the claims have been considered but are moot in view of the new ground(s) of rejection.
